

Airtight

- 100% product protection
- Protection against moisture
- Protection against external influences

Dimensionally stable

- High material density
- Safe transport
- Heat resistant

Stackable

- No danger of tipping over
- Low dead weight
- No danger of slipping

Stainless Steel Solutions

Clean and safe powder handling for your process.

Intelligent solutions for snus and pouches manufacturing.

Sustainable

- Durable, corrosion resistant
- 100% recyclable
- Resource saving & versatile

Tasteless

- Chemically resistant
- Taste & odor neutral
- Ensures product purity & quality

Easy to clean

- Smooth surface
- No dirt corners / dead spaces
- Easy, efficient cleaning - UltraClean design

Easy to integrate into your production processes - thanks to clever interface management.

Hoppers

with butterfly valves for process-safe filling and transferring of powders.

Drum rollers

for safe and easy transport by hand.

Suction ring

for efficient and residue-free suction during powder filling.

Suction hood

to reduce the dust load.

*UN approval for solids and liquids
